JB MICROSCOPE™
CLEAR VISION

JBM-SM-01

All the Microscopes are latest in design, precision-engineered with finest features, usually found in high-priced models. Their operational functions can be carried out without any difficulty and provide excellent crisp clear image so that even advanced studies are routinely possible.

At high power, you'll be able to examine specimen slides of yeasts and molds, cultures, plant and animal parts, fibers, bacteria and more. Use the lower magnifications to examine objects like coins, rocks, insects and more.

Model Number	JBM-SM-01
Observation Head	Monocular die-cast body,
Magnification	100x – 450x
Eyepieces	10X
Objectives	5x, 10x, 45x,
Stage	Casting body stage with clips holding the slides
Focusing	Quadruple Revolving Nosepiece is provided with positive click stop for proper centering
Condenser	Movable ABBE condenser, with aspheric lens NA 1.25
Illumination	Optical mirror (Day light)
